

Since the FCC became my parents and decided to come in and "clean up" commercial radio I have invested in XM Radio as my primary source of entertainment. I drive for a living and therefore the radio is VERY important to me in my daily life. I feel that the NAB should either leave XM alone, or make an effort to improve their own product. If XM can provide me with "instant" traffic and weather in the area I am in that sure beats waiting for "traffic and weather together on the 8's" or whatever other silly thing the local stations do.
